Press Release

December 19, 2018

New *Light-N-Carry* LENEXA LNC7250B Versatile Performance Light

Clore Automotive introduces the LENEXA (Part No. LNC7250), a new versatile performance light, from *Light-N-Carry*. The LENEXA provides versatile illumination with a professional level lithium battery, three operating modes, hands-free operation and a wide variety of mounting options.

The LENEXA features three operating settings (Spot/Flood/Dual) to cater to the wide range of lighting needs found in every environment, whether that is illuminating hard-to-reach spots under the hood or bringing visibility to a low-lit garage. It also comes equipped with a dimming feature, giving the user full control over each of the working modes. These COB (Chip-On-Board) LED lights are powered by a rechargeable Clore PROFORMER 18650 Lithium Battery; the same type of battery found in our tried-and-true Jump-N-Carry jump starter line.

The LENEXA is easy and convenient to use, featuring 180° rotating base, 1/4x20 mounting ability, and hands-free motion-activated control. This allows the light to be turned on and off with the simple wave of a hand, which will come in handy when working hands are covered in grease or busy using other tools. The LENEXA Kit includes our M-LOCK Head Strap, M-LOCK Belt Clip, and the M-LOCK Action Mount for mounting action camera accessories.

Clore Automotive is a leader in the design, development and manufacture of automotive service equipment for professionals and consumers, including jump starters, battery chargers, battery testers, power inverters and LED lighting solutions. Clore Automotive products can be found in a wide variety of outlets servicing professionals and automotive enthusiasts, including auto parts stores, mobile tool dealers, industrial MRO distributors, farm and ag outlets and more. More information can be found at www.cloreautomotive.com.
