New PRO-LOGIX PL3760 12/24V Wheeled Battery Charger from SOLAR

Clore Automotive introduces Model No. PL3760, a 12/24 Volt intelligent wheel charger, from *SOLAR*. The PL3760 provides three operational modes for comprehensive service: auto charging mode, stable power mode and engine start assistance mode.

Auto charging mode utilizes an advanced, microprocessor-controlled process to deliver an optimal charge to each battery serviced. The PRO-LOGIX charging process results in improved battery condition and restored reserve capacity. The PL3760 features multiple charge rates for versatile fleet service: 60/40/10A 12V rates and 20/10A 24V rates. Special Soft Start and Recondition routines automatically engage as needed. Plus, with Smart Clamp Technology and numerous safety features, PRO-LOGIX brings unsurpassed safety to your everyday battery charging needs.

Stable power mode maintains vehicle system voltage at the desired level to support a variety of diagnostic, repair and reprogramming applications. The PL3760 supports system voltage maintenance from 13.1-14.9V, selectable in 0.1V increments, allowing the operator to dial system voltage in exactly as needed. Engine start assistance mode provides extra amperage to start vehicles with dead batteries or other starting problems caused by a lack of power. The PL3760 delivers 250A 12V Engine Starting Assistance.

An LCD display provides rich detail for easy operational set-up and monitoring. Status lights alert the operator to the charger's operational progress and provides warning of charging errors. The unit is shipped fully assembled, saving time and effort right from the start. The PL3760 also meets all energy efficiency requirements in the US and Canada.

Clore Automotive is a leader in the design, development and manufacture of automotive service equipment for professionals and consumers, including jump starters, battery chargers, battery testers, power inverters and LED lighting solutions. Clore products can be found in a wide variety of outlets servicing professionals and enthusiasts, including auto parts stores, mobile tool dealers, industrial MRO distributors, farm and ag outlets and more.
