

Specific testing regimens for a wide variety of battery types:

Model No. BA427 Digital Battery and System Tester with Integrated Printer

The new flagship in our testing line, the Digital Battery and System Tester with Integrated Printer, **Model No. BA427**, offers a complete testing solution for 6 and 12 Volt batteries and 12 and 24 Volt charging systems. Compatible with a wide variety of battery types, the BA427 features a testing range to 3000 CCA, direct temperature acquisition from the tested battery, USB communication and battery management software.

- Quick, easy battery and system analysis
- 6 and 12 Volt battery testing
- 1.5-30V operating range
- 40-3000 CCA testing range
- 12 and 24 Volt system testing
- Integrated printer
- Temperature compensation
- Extra-long 10' leads
- Enables connection of volt probe (optional accessory)
- Enables connection of an amp clamp (optional accessory)
- USB port with battery management software for PC computers
- Storage case
- Counter to track tests performed

Testing is quick and easy and allows the operator to perform either a battery test, system test or both. The tester walks through the testing sequence, prompting for key pieces of information and guiding the operator from one step to the next. The tester provides accurate assessment of both charged and discharged batteries, saving time and effort.
