- Repair Service Coupon
- Microfiber Storage Bag

The JNC305 is a lightweight, lithium 12 Volt Jump Starter designed for jump starting a wide range of passenger vehicles. Featuring 21" cable reach with MaxAccess clamps designed to provide improved access to hard-to-reach starting points, the JNC305 delivers 300 Start Assist Amps, enough to start most V6 vehicles. Whether you are dealing with a problem vehicle battery or encounter a surprise electrical system issue, the JNC305 can get you moving again, quickly and easily. With its override feature, it can even service totally dead (0.0V) batteries.

In addition to being a jump starter, the unit features a USB Port to power electronic devices, such as a phone or tablet. It also features numerous safety features, such as Reverse Polarity Protection, Short Circuit Protection, Backfeed Protection, Over-crank Protection and more to make jump starting safer for the user and the equipment serviced.

Includes a Repair Service Coupon, which allows a customer to receive a one-time, fixed fee repair of their unit after the warranty period has expired, for the amount shown on the coupon.
